### **ISO/IEC 27001:2013**

Managing information risks.

The ISO/IEC 27000 family of standards helps organizations keep information assets secure.

ISO/IEC 27001 is a security standard that outlines and provides the requirements for an information security management system (ISMS). It specifies a set of best practices and details a list of security controls concerning the management of information risks. While the 27001 standard does not mandate specific information security controls, the framework and checklist of controls it lays out allows ZeroBounce to ensure a comprehensive and continually improving the model for security management.

### **ISO/IEC 9001:2015**

Quality Management.

The ISO 9000 family addresses various aspects of quality management and provides guidance and tools for ZeroBounce to ensure that our service consistently meets customer's requirements and that quality is continuously improved. This standard is based on many quality management principles including a strong customer focus, the motivation, and implication of top management, the process approach and continual improvement helping ZeroBounce develop a best-in-class quality management system (QMS)

International Board for IT Governance Qualifications certifies that **Delaney Forsythe** has pass the examination and is awarded the qualification of Certified ISMS Lead Implementer (CIS LI)

**Qualification Date: 2018-08-10      Certificate Number: 487840**
